

Quality Policy

Rev. 12/15/2021

Coridian is provider of barcoding and data collection solutions. As experts in data collection technology, we work to provide knowledgeable sales and information technology expertise, lending knowledge to the industry and staying abreast of the latest technology trends. Our customer relationships are built on understanding business needs and applying appropriate technology-incorporating barcode scanners, barcode printers, rugged mobile computers, barcode labels, robotics, wireless networking, and related technologies. We also provide consulting, project management, training, deployment, technical support, repair, and depot services to the warehousing, logistics, manufacturing, and distribution organizations we work with.

Painted on a large wall and within view of most of our office is our mantra, “Helping Customers Operate Better.” We take that to heart. With that singular focus, we partner with businesses to streamline management, improve accuracy and increase productivity. And we do it as a team.

We consistently provide products and services that meet or exceed the requirements and expectations of our customers. We actively pursue ever-improving quality through programs that enable each employee to do their job right the first time and every time.

Dave Green
